**INTERSECTION** | Columbia will soon begin construction on the first set of buildings between 125th and 131st Street. Six buildings have architects and schools.

# In Manhattanville, plans develop where buildings stood

Some locals say M’ville plans still ambiguous

BY ABBY MITCHELL  
*Spectator Senior Staff Writer*

On a recent rainy Wednesday afternoon, Manhattanville residents Laura Washington and Alex Blackwood walked through the area in West Harlem where Columbia is beginning to build a second home.

“I definitely don’t think of the expansion on a day-to-day basis. I know about it, probably more than other people because I seek out information on my own,” Washington said.

Blackwood agreed. “I think it’s really left up to people to be informed about what’s going on. I know everything from her,” gesturing at Washington.

Neither of the two friends knew much about the Community Benefits Agreement, a document that guarantees the University’s financial support of the community and had been publicly debated from 2006 to 2009.

“I know a bit about it—it seems kind of complicated. I don’t know what the terms are, I just know Columbia is supposed to help out, somehow,” Washington said.

Added Blackwood, “I guess it isn’t really buying us out, but that’s what it sounded like to me at first.”

Blackwood and Washington are hardly alone. Despite efforts by the University to make its plans public and engage its neighbors with town hall meetings, many Manhattanville residents say that they still do not know what the University’s plans are for the neighborhood.

**‘YOUR EFFORTS ARE NOT SEEN’**  
Maria Cruz, who for 18 years has lived in 3333 Broadway, a huge affordable housing complex overlooking the expansion site, acknowledged that

BY FINN VIGELAND  
*Spectator Staff Writer*

Six cranes loom over the barren site on 129th Street. Where manufacturing warehouses once stood, today a mound of dirt signals the beginning of construction on Columbia’s expansion into Manhattanville.

Seven years ago last week, University President Lee Bollinger first announced Columbia’s plans to build the largest expansion of the campus in over 100 years—and in December the University surpassed the final legal hurdles that had threatened the plans.

Vice President for Facilities Joe Ienuso told Spectator last week that the first buildings are scheduled to open in 2016.

“I’m going to hand the keys to somebody in my organization and say ‘let them in’ in 2016,” Ienuso said.

Scheduled for completion by 2020, Phase I of the project will create six buildings, the future homes of the Jerome L. Greene Science Center, the School of the Arts, the Business School, the School of International and Public Affairs, and an

academic conference center. The area spans from 125th to 131st streets, a three-block distance due to the layout of the Manhattan grid, and from Broadway to 12th Avenue.

The full expansion zone will stretch north to 133rd Street and be completed by 2033. Of the 17 planned buildings on campus, the specific uses of only six have been determined.

In the last few months, as the University has selected architects and proceeded with demolition, Spectator has taken a look into what’s happening north of 129th Street: a neuroscience center with over 70 labs, a Business School trying to enter the 21st century, and a conference center University officials have dubbed “the Bow Tie.”

**JEROME L. GREENE SCIENCE CENTER**

Construction on the science center, the only building that has been completely designed, will start in spring 2013 and last three years, Ienuso said.

It will house the University’s Mind, Brain and Behavior Initiative and with it 70 labs, a functional imaging

center, dozens of meeting spaces, and an education outreach center targeted at “anybody else who wants to learn about current views on brain science,” said Dr. Thomas Jessell, the appointed director of the building and a professor of neuroscience, biochemistry and molecular biophysics.

As for fundraising, “we’re set,” Bollinger said. “Now we have to raise funds for programming.”

In March 2006, the University announced that they had received a donation of over \$200 million by Dawn M. Greene in honor of her late husband, Jerome L. Greene, CC ’26, Law ’28. At the time, it was the largest gift ever given to Columbia and the largest private gift received by any American university for the creation of a single facility.

Jessell said the Greene gift “gave the University the confidence that this is really going to work,” but that “the building is really more expensive.”

The building’s design, helmed by Italian

New local corporation to distribute CU funds

BY SARAH DARVILLE  
*Spectator Senior Staff Writer*

Columbia has promised \$150 million for the neighborhood around its expansion zone in Manhattanville—and an organization working to actually disperse \$74 million of that money is slowly emerging.

Those benefits were negotiated by a group of community members and politicians known as the West Harlem Local Development Corporation. Since the agreement was finalized in 2009, the University has paid \$1.5 million into the LDC’s fund, but the LDC has not distributed any of it, held public meetings or given indications about its immediate plans for that money.

“I don’t think that it’s a secret the community has been angry and frustrated with the LDC in the past,” CB9 Chair Larry English said.

Now, LDC President Donald Notice says that plans are near completion for a new organization to take over the distribution of Columbia’s money, something he insists the LDC never had the authority to do. The new development corporation is moving forward with a different set of board members and specific procedures for giving money to community organizations—statements that local residents say they’ll be holding Notice to in the coming months.

**FIRST STEPS**

Tensions over the LDC’s lack of accountability came to a head in late February, when members of West Harlem’s Community Board 9 called on the organization to disband completely.

## US Navy, Columbia finalize NROTC program

Details for ROTC campus return under discussion

BY SAMMY ROTH  
*Spectator Senior Staff Writer*

Columbia has reached an agreement with the U.S. Navy to officially recognize a Naval ROTC program on campus, University President Lee Bollinger said on Friday.

The Reserve Officers’ Training Corps has not been recognized by Columbia since 1969, when protests over the Vietnam War led to the dissolution of the University’s long-standing NROTC program. Bollinger told Spectator that the agreement marks a “historic turning point” for Columbia.

“The elimination of ROTC was a symbolic gesture of frustration and anger towards policies and practices that people strongly disagreed with,” Bollinger said. “And I think the sort of question now is, how do you engage in a more positive way given this opportunity?”

Columbia students enrolled in NROTC will participate in military training programs and classes through a consortium at the State University of New York Maritime College in the Bronx. Students could have participated in this NROTC program previously, but under the new agreement Columbia will give NROTC cadets academic credit for their work. There are currently no Columbia NROTC cadets.

Navy spokesperson Tamara Lawrence said that it is not unusual for a school to participate in NROTC through a nearby school with an already-established program. But the agreement will give NROTC a “very visible” presence at Columbia, she added.

“The ROTC program will certainly benefit from being at Columbia,” Lawrence said. “That is absolutely a relationship we’ll be able to open up and offer up some choices for students.”

Bollinger said that the University still has to work out the details of the NROTC program with the Navy.

“Even though a lot of this is symbolism, there are some practical things that are involved and figuring those out consistently with the community and Columbia’s academic standards is important,” he said.

A Columbia press release noted that Provost Claude Steele will lead a committee which will “oversee implementation of the ROTC program consistent with Columbia’s academic standards.”

The committee will likely decide what sort of academic credit it to award to outside NROTC classes, as well as what space on campus cadets should be able to use. Lawrence said that under the new agreement, ROTC cadets will be able to meet with active-duty Navy and Marine Corps officers on Columbia’s campus to receive “mentorship and guidance.”

# Manhattanville: Phase I

## 1 SCHOOL OF INTERNATIONAL AND PUBLIC AFFAIRS

**ARCHITECTS:** Renzo Piano Building Workshop and Skidmore, Owings and Merrill.

**FUNDING:** “Further away” than the other Phase I buildings, according to President Bollinger. SIPA has prioritized its current academic programming over future fundraising.

**STATUS:** Piano has not begun a preliminary design. The building is not scheduled for completion until at least 2020.

One of the difficulties in the move will be that SIPA shares many of its faculty members with the Faculty of Arts and Science.

## 2 BUSINESS SCHOOL

**ARCHITECTS:** Diller, Scofidio + Renfro

**FUNDING:** \$400 million goal. Includes a \$100 million gift from Henry Kravis, Business ’69. Bollinger says “they’re really on their way.”

**STATUS:** In a preliminary design phase. Schematic design will begin by the end of summer 2011. No opening date has been set.

Two buildings, located between 130th and 131st Streets in the block between Broadway and 12th Avenue.

The buildings will be separated by a 40,000-square foot recreational green space open to the public.

Architect Liz Diller compared the two buildings to “Fred and Ginger,” the ’30s tap-dancing duo. “They don’t look alike but they work synchronously and in step.”

## 3 SCHOOL OF THE ARTS

**ARCHITECTS:** Renzo Piano Building Workshop and Skidmore, Owings and Merrill.

**FUNDING:** “Very close,” according to Bollinger.

**STATUS:** Construction will begin after the completion of the slurry wall. The building should open with the science center and the academic conference center in fall 2016.

Located just west of the science center in the middle third of the block between 129th and 130th Streets and Broadway and 12th Avenue.

Dubbed “the Lantern” by Piano because “the center of gravity is here and the campus will radiate out from there,” according to Joe Ienuso.

Home to a film screening center, flexible performance and reading spaces, and a first-floor gallery. One of the smallest buildings in the plan.

## 5 ACADEMIC CONFERENCE CENTER

**ARCHITECTS:** Renzo Piano Building Workshop and Skidmore, Owings and Merrill.

**FUNDING:** Ongoing. Bollinger is “optimistic” about the progress.

**STATUS:** Construction will begin after the completion of the slurry wall and the building should open with the Lantern and the academic conference center in 2016.

Located in the triangle of land formed by the intersections of 125th Street, 129th Street, and Broadway. The triangle has a symmetrical opposite down the street, and the two triangles together inspired Piano to nickname this building “the Bow Tie.”

The University has no one unified location to host a conference. This building will connect the Morningside, Medical School, and Manhattanville campuses as a central meeting spot.

## 4 JEROME L. GREENE SCIENCE CENTER

**ARCHITECTS:** Renzo Piano Building Workshop and Skidmore, Owings and Merrill.

**FUNDING:** Complete. Includes a \$200 million gift from Dawn M. Greene, wife of Jerome L. Greene, CC ’26, Law ’28.

**STATUS:** Construction will begin spring 2013 and the building will be complete and usable by fall 2016.

Located in the eastern third of the block between 129th and 130th Streets and Broadway and 12th Avenue.

Will host 70 faculty members, from fields as varied as neuroscience, applied mathematics, biology, statistics, and computer science. Will contain 70 labs a Biosafety Level-3 facility to research “severe to fatal” diseases.

Only building whose architectural design is completely finished.

GRAPHIC BY REBECCA SCHWARZ, FINN VIGELAND, AND JEREMY BLEEKE

## Bollinger says he’s “optimistic” Columbia will soon secure funds for most Manhattanville buildings

### CONSTRUCTION from front page

architect Renzo Piano, embraces the interdisciplinary nature of neuroscience.

Two floors are interconnected by internal stairs so that, according to Jessell, it is “as easy to interact vertically as it is horizontally with one’s neighbors. There could be 10 or 20 labs working together at a time.”

Of the approximately 70 faculty members, two-thirds will be “card-carrying neuroscientists,” as Jessell put it. But for the rest of the faculty, Jessell said, “we’re going to need disciplines that go way beyond conventional views of what neuroscience is—we will work with engineers, computer scientists, applied mathematicians, statisticians, physicians, biologists, the works.”

Final plans for the building include entrances on all four sides, which Ienuso said was representative of the open-campus approach they have taken towards the design.

“Think about Manhattanville as if you took the Morningside campus and you grabbed it from the middle and turned it out,” Ienuso said.

Members of the Coalition to Preserve Community, a local activist group, have said that they are concerned that the center includes plans for a Biosafety Level-3 facility, a laboratory that studies organisms which could cause serious diseases, but for which cures exist.

“A great deal of attention has gone into thinking how to effectively ... introduce a new science building into that area,” Jessell said. “There will be molecular biology research going on, but nothing in any way ramping up the level of biohazard safety.”

### SCHOOL OF THE ARTS

Just to the west of the Greene Science Center will be the new home of the School of the Arts, but those involved with the project call it the Lantern Building. A nickname developed by Piano, its architect, Ienuso explained:

“The Lantern Building describes for Renzo, from an urban planning perspective, the beacon—its function, from its purest and simplest form.”

Piano is “a romantic and he is a humanist at his core,” Ienuso said. “You’ll see in almost everything that Renzo draws by hand this sort of spiral. And what Renzo means by that is what I would refer to as the center of gravity. Everything has a center of gravity. For Renzo, the center of gravity is here and the campus will radiate out from there—the lantern.”

The building—one of the smallest in the site plan—will have a film screening center, flexible performance and reading spaces, and a gallery on the first floor to work with the Art History department and the Wallach Gallery, said SoA Dean Carol Becker.

“These are general categories that will need much more elaboration as the building proceeds,” Becker said.

The SoA has received two substantial gifts, Becker said, with others pending.

Bollinger said, “I think we’re very close with fundraising. ... I feel that we’re almost there” for it to open in 2016 alongside the science center.

### BUSINESS SCHOOL

The two B-School buildings will be “a kind of a mini-campus inside of a bigger campus,” said architect Liz Diller of Diller, Scofidio + Renfro, the Manhattan-based firm that was hired in January. Located between 130th and 131st streets, the buildings will look out onto a large green space of about 40,000 square feet.

“It’s a center of the Manhattanville campus, so it’s a very, very important spot,” Diller said.

The B-School is in a preliminary design phase while the architects and the University explore the best way to fill the two buildings. Diller said that in addition to a large amount of area devoted to faculty and

administrative spaces, “there are all sorts of amenities, an auditorium, food service, and social spaces.”

Diller said she hopes to strike a balance between the two buildings.

“The thing that we don’t want to do is make one building that’s very animated with teaching and learning and another building that is just support,” Diller said. “We’re trying to distribute the energy of the two programs between the two buildings, but we don’t want them to replicate each other.”

## “In the end we’re making a campus, not just buildings. We’re working on a small city.”

—Liz Diller, architect for the Business School buildings

Diller likened the relationship between the two buildings to the 1930s’ tap-dancing duo of movie stars Fred Astaire and Ginger Rogers.

“With Fred and Ginger, it’s a nice metaphor in that you really have two very different beings. They don’t look alike but they work synchronously and in step.”

By the end of this summer, Diller, Scofidio + Renfro will develop a schematic design—physical blueprints—although a specific completion date hasn’t been set yet.

The firm will also work to make the Business School a model for 21st-century economics. “The influence of the news on policy and on the markets is such a changeable thing,” she said. The connectivity between the Business School and other business schools around the world, as well as news sources,

news sites, and the ability to use smart technologies, is an interesting challenge. It should serve as a kind of gathering space.”

A \$100 million gift by Henry Kravis, Business ’69, will fund one of the two buildings. Bollinger said, “I think they’re really on their way” to reaching the \$400 million goal.

### ACADEMIC CONFERENCE CENTER

Because neither the Morningside nor the Medical School campus has a unified place to hold a conference, the academic conference center will accommodate international meetings hosted by faculty from all of Columbia’s schools.

Build on the triangle of land where 125th Street meets 129th Street, the building received the nickname “the Bow Tie” from Piano. Just down Broadway is another triangle of land, home to the famed jazz bar The Cotton Club—and though that triangle is not part of the construction, Piano thought the two pieces of land resembled a bow tie.

It will be located at the southernmost tip of the Manhattanville campus—a location meant to connect the center to undergraduates in Morningside Heights.

“It’s a way of attracting the Columbia undergraduate away from their zone of familiarity at 116th ... We want to break down that barrier of walking up Broadway,” Jessell said. “Every effort will be made to make this as enticing for undergrads as well as for international visiting scholars.”

In a February University Senate meeting, Bollinger said he hoped the conference center would be open within five years, at the same time as the science center and the School of the Arts building.

Bollinger said in a recent interview that the University’s fundraising for the center was ongoing. “I’m optimistic. I can’t say we’re quite almost there, but I’m optimistic,” he said.

### SCHOOL OF INTERNATIONAL AND PUBLIC AFFAIRS

Of the six buildings, the last one to be completed will be home to SIPA. Ienuso estimated it would not be complete until the early 2020s.

Because the building is slated for construction after the other five, both the creative and financial processes are behind those of the other schools who will make the move to Manhattanville. Piano has not begun a preliminary draft of the building’s design, and fundraising has taken a backseat to evaluating current SIPA programs.

The building “is further away in terms of fundraising” than the other Phase I buildings, Bollinger said, but “[SIPA Dean] John [Coatsworth] and I are talking about how to begin a building campaign.”

Coatsworth said that the school’s strategy for raising money begins “at square one—with a stronger donor base and fundraising infrastructure.”

“Other schools moving to Manhattanville may be benefiting from greater depth on these two fronts,” Coatsworth said. “As always, we are optimistic about the future here at SIPA, but we also are mindful that it is premature to be talking about a move which, while eagerly anticipated by every school involved, will be years in the future for any of us.”

Executive Vice President Robert Kasdin told Spectator that Coatsworth, former Provost Alan Brinkley, and Bollinger made the decision that their first priority for SIPA would be to “further the quality of the programming.”

“They’ve made extraordinary efforts to develop SIPA, but academic programming is going to come before physical space needs,” Kasdin said.

### NEXT STEPS

Demolition began in late summer 2010, but so far only the first block between 129th and 130th streets has been completely cleared of buildings.

Before construction on any new buildings can begin, Bovis Lend Lease, the principal construction company, must build a slurry wall—a steel trench around the perimeter of the construction site to keep out groundwater. Ienuso estimated work on the slurry wall will begin within a month and last for two years.

The completion of the slurry wall in spring 2013 will mean the beginning of steel rising for the first building, the science center, said Philip Pitruzzello, Vice President of Manhattanville Construction.

Pitruzzello said there is no timeline for the condemnation and the eventual acquisition and demolition of the properties which belong to Nick Sprayregen, Gurnam Singh, and Parminder Kaur, who have not sold their properties to the University.

Sprayregen’s Tuck-It-Away Storage properties currently take up part of the SIPA site plan, while Singh and Kaur’s two gas stations take up part of the academic conference center and SIPA sites.

Beth Mitchell, a spokesperson for the Empire State Development Corporation, which has the power to use eminent domain to purchase the properties, said that the organization is in the process of appraising the contested lands. Once the ESDC makes an offer it can begin to acquire the properties to sell to Columbia. Mitchell said she expected the acquisition process to begin before the end of the year.

According to Columbia officials, details and completion dates are still uncertain for the other phases of the expansion plan, which will develop the blocks north of these six buildings. The final phase isn’t scheduled for completion until 2033—over two decades away.

“In the end we’re making a campus, not just buildings,” Diller said. “We’re working on a small city.”

finn.vigeland@columbiaspectator.com

# University committed to cooperation, residents remain wary

COMMUNITY  
from front page

the new construction is “affecting a lot of people.” However, when asked if she knew exactly what was being built or what the changes would be, she responded, “Not at all. I don’t ask about anything.”

Grant Houses resident Deborah Griffith joked as she opened a letter from her Tenants Board, “Maybe this says something. No, it doesn’t.”

She continued, “I know all of this is Columbia property and they’re going to be building all of this. Everything I know about the expansion though, it’s not through the management, it’s just things that I’ve heard. I don’t know what will happen to the people living here, if it’s necessary to relocate.”

Alicia Barksdale, president of the 3333 Tenants Association, summarized her perception of the University’s outreach with five simple words: “Your efforts are not seen.”

According to Barksdale, many of her tenants are still scared about the University taking over and don’t know where to look for answers.

“The perception of the University is not good,” she said. “It’s very confusing if you don’t know if you’ll have somewhere to live.”

3333 resident Mary Autrey said she wants to sit down and meet with the “top dogs” at Columbia to better understand the expansion plan and the role of the community.

“They’re keeping a lot behind closed doors,” Autrey said. “Come out and say exactly what you’re doing and why you’re doing it and what our chances are.”

**PROMISES, PROMISES**

University officials say that they have provided numerous opportunities for local residents to inform themselves and to benefit from new programs.

“Among people who closely follow these issues, I don’t think that there are many misconceptions since we are always willing to respond to questions, answer emails, and attend community meetings,” said Maxine Griffith, the University’s executive vice president of government and community affairs.

Griffith’s office, which handles communication between the University, local community boards and politicians, maintains ties to the community by supporting local non-profits and community organizations, ranging from the Harlem Little Leagues to a Public School Improvement Program.

The University has also asserted its commitment to integrating community needs into the design of their buildings.

CHABLI BRAVO / STAFF PHOTOGRAPHER

**AT THE GATES** | Residents close to the construction in Manhattanville said they haven’t heard much from the University about what’s going on at the site.

LizDiller, one of the architects for the new Business School buildings, said that public space and amenities have been a big consideration, and that her firm would be interested in meeting with Community Board 9.

**“The relationship is evolving and we’re trying to develop trust between the University and the residents.”**

—Larry English, CB9 chair

“How do we make sense of campus but also make that campus accessible to everyone? How do we produce enough activities in there that actually draw the community inside?” Diller said. “The Business School really has to outreach ... on the very local level in West Harlem.”

But some community organizers and residents remain skeptical, given what they consider a history of broken promises between the University and the community.

CB 9 member Brad Taylor claims that Columbia “continues to stumble” in building a relationship with the community due to disregarding past commitments. In particular, Taylor was angered by the University’s decision not to provide retail space for the community in the School of Social Work on Amsterdam Avenue between 121st and 122nd streets.

“For the University to unilaterally decide to turn this over to its own academic use without re-engaging the community does not bode well for commitments that it is now making in Manhattanville,” Taylor said.

**COMMUNITY BOARD COOPERATION**

The main channel for communication between the University and the community has been West Harlem’s Community Board 9. As demolition began and plans finalized, Larry English took over the board from longtime chair Pat Jones.

Upon his election, English made it clear that he fully supported the expansion, marking a shift in the board’s stance on the project and drawing scrutiny from some fellow board members and residents.

“The fact that I was not

here through the war gave me a unique perspective,” English said. “It wasn’t in the community board’s interests to get up and walk away from the table.”

At the February general board meeting of CB9, English went on the defensive about his cooperation with the University, saying that it was still the most productive way to approach the project.

“I take responsibility to come to you ... and lay out to you what I believe is the right direction for this organization for the next six months. I don’t expect for everyone to agree with me,” English said.

But CB9 member Savona Bailey-McClain claims that English’s attitude does not fully coincide with the concerns of the community.

“I do feel he needs more understanding,” she said in an interview last month. “We’ve got some people who are still pretty angry about the development and ... people are concerned about him being in the position.”

Taylor does not share Bailey-McClain’s concerns.

“Comments that I’ve seen and heard the chair make on the issue of the community’s relationship with Columbia stress the building of a productive relationship going forward. That could just as easily be seen as

‘pro-community’ as ‘pro-Columbia,’” he said.

Griffith said that English has adapted well to the challenges of the project.

“He’s done his homework and become very sophisticated about the University,” said Griffith. “When an issue arises, perhaps unlike the average citizen, he often knows whom he should speak with.”

Over the past few months, English has had several informal one-on-one meetings with University administrators, according to Community Affairs Associate Vice President Victoria Mason-Ailey.

“I’ve learned that Columbia is not one big entity that moves in one step,” English said. “The relationship is evolving and we’re trying to develop trust between the University and the residents.”

**CONTINUED RESISTANCE**

Though the community board has adopted a more conciliatory stance with Columbia, one group has remained staunch in its censure.

The Coalition to Preserve Community, a neighborhood group actively opposed to the expansion, has held several protests in recent months, despite the increasing pace of construction.

“It’s important to keep before the community and the larger public the failure of the University to live up to the promises it made in connection with the expansion,” said Ruth Eisenberg, one of the founders of CPC.

CPC member Ellen Isaacs said that CPC plans to continue protesting about job creation, affordable housing, and the types of buildings that can be constructed under the plan.

“Columbia University’s expansion can only be mitigated by building a movement of community residents, students, and their allies,” Isaacs said.

Recently, CPC has been in communication with a new crop of student activists to raise awareness about the expansion on campus, as SCEG, the student group against Manhattanville, has been relatively inactive in the last year.

“Student activism hasn’t been around about Manhattanville because students feel that it’s a done deal. But I think that students don’t realize the scale of the expansion, that it will take many years to develop,” said Yoni Golijov, CC ’12, who has protested with the CPC. “We do have a lot of time to change things.”

Fellow organizer Alex Klein, CC ’12, says that the students he protests with haven’t yet formed an official group, but they plan to do so by the beginning of the

fall semester. Unlike SCEG, however, Klein and other protesters may not make their group an official Columbia-recognized club, giving local residents the opportunity to join.

“We want it to be something that all types of people can engage in,” Klein said.

In the meantime, CPC co-founder Tom DeMott says that his group is here to stay.

“Resistance to Columbia’s deceit is a matter of self respect,” DeMott said. “We’ll just keep being out there, and let others determine the impact.”

**MOVING FORWARD**

Two teenage girls, residents Nyesha McNealy and Emoni Gandia, remained hopeful about the expansion as they walked through their neighborhood last Friday.

“I don’t like how they’re pushing people out, but the neighborhoods are a little better now,” McNealy said.

Emoni agreed, though she said it is a little bittersweet. “I think Columbia is going to provide better opportunities and more education around here, but this place is going to change. A lot of the stuff here has history, has memories.”

3333 Tenants Association president Barksdale is also trying to be optimistic, particularly since the University arranged a meeting with the tenants of 3333 this Wednesday. “There are a lot of things that need to be addressed now that it’s all really beginning,” she said. “You can’t always go by first impressions.”

Susan Russell, director of operations for City Council member Robert Jackson, said that Jackson is open to starting on a clean slate with the university.

“What happened in the past isn’t relevant anymore. What we’re trying to focus on is that the University and community have shared interests,” Russell said. As for the benefits that Columbia has promised the community, “He [Jackson] is prepared to give the University the opportunity to do what they promised.”

From protesters to politicians to the community board, the general consensus is that the University needs to listen to its neighbors as officials make important decisions in Manhattanville.

“Bettering the University’s relationship with the community is not rocket science,” said Taylor. “It involves building trust by acknowledging, not dismissing, community concerns, and by living up to promises.”

Daphne Chen and Jackie Carrero contributed reporting.

# Islamophobia thrives at Columbia

Most articles I have published thus far in Spectator have been met with a barrage of Islamophobic comments on the newspaper's website. After having followed Spectator's coverage of anti-apartheid Palestine activism on campus, I was prepared for this series of attacks. For instance, when Spectator ran a piece covering Columbia Students for Justice in Palestine's mock checkpoint in November, an online commenter referred to us as "little devil worshipers who serve that monster god allah," "rodents," and "baby cock-roaches" taking orders from "daddy jihad." But while this comment and a few others were removed for violating Spectator's policy on comments reflecting "racial, ethnic, or religious intolerance," most remained.

It is easy to dismiss online comments as the work of a select few who may not "genuinely mean" what they spew into the cyber realm. But the fact that most Islamophobic comments aimed at our community pass Spectator's "tolerance test" reflects the extent to which this kind of rhetoric has become acceptable within our immediate environment. A comment appended to a previous piece of mine, in which the Prophet Muhammad was referred to as the "creator of genicidal [sic] cult," remained after the Spectator moderator's review. Similarly, the following tirade, posted on the aforementioned checkpoint article, was not considered "sufficiently intolerant" to warrant removal: "Muslims - Stay in your own countries. Get out of our Western countries and get out of Israel, the only civilized country in the Barbaric Muslim Middle East." The same commenter added in another comment: "Get out of our civilized West, Mohammedans." A separate comment, in which it was asserted that Jews have "evolved and become civilized" while Muslims continue to act like "barbarians/savages," also remained. When another commenter was accused of being Islamophobic, he retorted: "I take my Islamaphobia [sic] with me wherever I go and I just so happen to be here right now, thank you very much!" In response, a "Mr Phuckislam" wrote: "Well said." This exchange, too, remained.

That a member of Spectator staff would tacitly approve of such blatant (and, in the last case, avowed) Islamophobia begs the question: Does content with Islamophobic and/or anti-Arab racist overtones in the school's paper also go unchecked? The most recent piece on ROTC to run in this paper indicates that systematic insensitivity does indeed carry over to the publication's editorial process. In Jeremiah Sharf's piece on ROTC field training, he describes an exercise in which student Michael Cole (dubbed "Colenan," like Conan the Barbarian) is playing a "difficult village leader" demanding "a new wife and 10 camels" in negotiations with American forces. In recounting the other trainees' reaction to the camel crack, Sharf writes that, while some laugh, "others are dead serious—they could easily be in Iraq or Afghanistan."

That a military training exercise features an anonymous Muslim caricature that trades in women and animals is only natural. The myth that the American soldier's opponents consist merely of misogynistic Muslim men mounted on camels, who are savages devoted not to legitimate resistance to occupation but to supreme ownership over their female subjects, is vital to the dehumanization process that underlies support for these wars. What is surprising, however, is Sharf's comment that this could "easily be in Iraq or Afghanistan," commentary that suggests that Sharf himself subscribes to this myth. In fact, regardless of whether or not my interpretation of this line is accurate, the mere fact that a program that includes such racist role-play has been invited back to our campus (a return openly supported by the Spectator editorial staff) is cause for concern.

Indeed, Spectator is by no means the only arm of campus life to be touched by Islamophobic sentiment. Classrooms are no exception. Given the popularity of political scientist Samuel Huntington's argument surrounding the incompatibility of Islamic civilization and liberal ideals, this comes as no surprise. For instance, in Introduction to Comparative Politics, students are requested to read "Islam and Authoritarianism" by M. Steven Fish, which argues that "Muslim countries are democratic underachievers," subsequently exploring the causal relationship between Islam and authoritarianism. This is the only reading in the syllabus, which several professors use, that tackles this issue—no other perspective is offered. In fact, regardless of the answer given, merely responding to the question "Is Islam autocratic?" legitimizes the false association between the Muslim faith and tyrannical, "backward" government.

Rather than blindly consume this "scholarship," students, particularly those who work for this paper, ought to remind themselves that Muslims are merely joining Japanese, Black, and Latino Americans in a long line of "national enemies" who are unfairly demonized in "respectable" political, journalistic, and academic circles. Remember that your sensibilities are shaped by your historical reality and that we needn't look far to catch a glimpse of the sorry state of "religious tolerance" in the U.S. In fact, if you're reading this article online, you can simply glance at the comment section below, where I'm confident a number of instructive examples await you.

### LETTER TO THE EDITOR

To the Editor:

I write to clarify Columbia Business School's position on conflict of interest policy, and to address the suggestion in the recent editorial, "For full disclosure" (April 15) that I had personally "...expressed disapproval of stronger policy implementation."

In fact, together with the faculty of the Business School, I strongly favor required disclosure of outside interests. In January 2009, a Business School committee that I chaired presented a set of recommendations to individuals in the University and the Senate responding to a draft version of the University's new conflict of interest policy. Our recommendations included a requirement that sources of funding be disclosed in all faculty research, including "...consulting products, journal articles, opinion pieces, testimony, working papers, web sites, etc." We also proposed that "Information about significant financial interests that have the potential of a conflict of interest should be disclosed on a confidential basis to the Office of the General Counsel..."

## Questioning impact

BY ROSE WINER

Thanks to the hard work of Green Umbrella, Columbia hosted over 40 environmentally-themed events in last six days—collectively named "No Impact Week"—in celebration of Earth Week. The sheer scale of "No Impact Week" and the fact that Green Umbrella members deemed it a success embody the current progress Columbia is making towards sustainability. Yet, while as an EcoRep I am encouraged by how much environmental development Columbia has made as a whole, I remain disappointed by the intangibility and lack of lasting impact campus environmental efforts have on the general student body. Clearly the campus is making an overall movement towards sustainability. But the question is, who's actually aware of this growth?

Don't get me wrong and mark me off as a bitter environmentalist. As member of a student group, I know well the horrifying amounts of red tape that impede even the smallest change on campus, and as a student I know how easily one gets turned off by groups that barrage in order to garner interest. Given those barriers, it is truly impressive how much environmental progress has been made at Columbia. We have compostable dinnerware at Ferris Booth, a flyering policy and an InterPublications Alliance that reduce paper waste, a student-run organic café called "The Flying Beet," and a new composter at Schapiro. Even non-environmental groups are becoming eco-aware, as exemplified by Sigma Nu's Grow NYC "Stop'n'Swap."

## Columbia higher-ups haven't taken many steps to actively influence students towards becoming sustainable.

However, having spoken to people outside of the "green" crowd, it seems very few who weren't already environmentally active knew "No Impact Week" was going on, despite daily emails, posters, and Bwog posts, not to mention the fact that

SHELLEY XU

### STAFF EDITORIAL

## Finding our place

In the fall, the administration lacked both a clear vision for the University's new global centers and an understanding of what it means to be a global university. Not much has changed since the last time the Editorial Board sat down to discuss Columbia's global centers a semester ago.

The "Columbia Goes Global Conference" held this past Wednesday revealed only a slightly more clarified stance on the issue of global centers and their role in forging Columbia's international presence.

The major issues that remain unresolved are how global centers will take shape, how they will contribute to a sense of "global-ness," and how they will benefit undergraduates. Since global centers have been envisioned as centers for specific research programs led by professors, it's unclear what students will be able to do within such a limited framework. The administration has given few suggestions for how undergraduates will benefit from global centers, though the centers are frequently cited as compelling tools to attract prospective students.

The conference on Wednesday was designed partly around the realization that undergraduates have been left out of the discussion around global centers. One of the three panels at the conference was for students, demonstrating the need to include undergraduates in Columbia's global vision and mission.

Though the administration has displayed its intention to include undergraduates in their plans to make Columbia a "global university"—a term yet to be clearly defined—its steps have been superficial thus far. There have been no substantial endeavors to garner undergraduate opinion or thoughts on the global centers, which is reflective of the fact that the global centers have been designed without undergraduates in mind.

This report, written well before recent concerns about academic conflict of interest, reflected our faculty's views on this issue and support of strong disclosure policies. My statements to the University Senate did oppose one specific requirement proposed at the time: that faculty members submit all funded research projects in advance for review and approval. I believed then, and believe now, that pre-approval of research by a faculty committee (other than research that can harm human subjects) is a violation of free speech and would negatively impact Columbia's ability to recruit new faculty.

We will make the Business School's 2011 conflict of interest policy report available immediately after our faculty has approved it.

Sincerely,

*Christopher J. Mayer  
Senior Vice Dean and Paul Milstein Professor of Real Estate  
Columbia Business School  
April 23, 2011*

Earth Day is a publicized global celebration. Those otherwise apathetic students that attended were likely partially drawn by the free food that events offered as incentive. To me this reveals a lack of environmental awareness and interest amongst the general student body.

This lack of environmental consciousness is manifested in a range of examples whose importance is sometimes lost in the wake of larger changes. Having a composter is fantastic—but many students don't even know what composting is. Reducing paper waste is important—but most students don't know how to recycle. Clearly there are overarching issues at work here. The problem is not simple, but is rather one faced by the global environmental movement: How do we boost the environmental awareness and behavioral change of the broader population? I certainly don't have the right answer, and I'm not saying Columbia's student groups aren't working to solve this question. But it seems there are a few factors lacking—take "No Impact Week," for example. While student groups were working to get our peers to the events, where was the administration?

Though pledging to make the University sustainable through infrastructure changes, Columbia higher-ups haven't taken many steps to actively influence students towards becoming sustainable. An email, speech, or other action during "No Impact Week" by an administrator like Michele Moody-Adams could have interested students who ignored or missed advertising by acknowledging the event as part of an ongoing sustainability initiative. Such tangible sponsorship by the administration and faculty of environmental activities on campus could, while not captivating all minds, increase awareness. Even the Office of Environmental Stewardship has barely any presence in students' minds, working behind the scenes rather than utilizing its resources front and center to actively make environmentalism accessible. In short, what is needed is a balance between the peer-to-peer undertakings of green groups and more tangible, active influence by administrative bodies to initiate and maintain students' awareness of Columbia sustainability. I'm far from saying this is the 100 percent effective end-all solution, and I'm proud of the progress we've made. I'm just still looking for further answers, because a campus with students able to vote but unable to recycle strikes me as a phenomenon that affects our impact on the global community—not only as students but as citizens.

## University, students assess future role of ROTC

### ROTC from front page

Manhattan, said that it is possible Columbia will institute its own ROTC-specific physical education courses, as some other schools participating in ROTC consortia have done. Columbia already gives ROTC cadets physical education credit for outside ROTC programming.

Robledo said he does not expect a sudden jump in NROTC enrollment, as it will take time for students who are interested in joining the military to start applying to Columbia.

“It’s not just about changing the culture at the University,” Robledo said. “It’s also the rest of the country and the rest of the world knowing that we have had an identity realignment.”

Before its ouster from campus in 1969, Columbia’s NROTC program trained more than 20,000 officers. Earlier this month, the University Senate authorized Bollinger to negotiate an ROTC return in a 51-17 vote.

The senate vote was preceded by a survey of students enrolled in Columbia College, the School of Engineering and Applied Science, Barnard College, the School of General Studies, and the School of International and Public Affairs. Of the 19 percent of students who responded to the survey, 60 percent were in favor of an ROTC return.

“I really wanted to do what the community wanted to do,” Bollinger said. “So in that, I am pleased that the outcome is definite and points in the direction of reengagement.”

After the senate vote authorizing him to negotiate with the military, Bollinger discussed the issue with the Council of Deans, a group of top University administrators, who unanimously supported a formal recognition of NROTC.

Lawrence said that Columbia had been in discussions with the Navy about ROTC for “over a year.” Bollinger explained that he was initially approached about an NROTC return by Secretary of the Navy Ray Mabus, but emphasized that an agreement was always contingent on the senate review process.

“I want to be very clear about this, nothing was done, it was always understood that whether this would in fact happen ... was entirely dependent upon the outcome of the process,” Bollinger

said. “So even though there were some discussions over time, they were in the form of ‘If this were the way it were to go on the campus, then what might happen in terms of the reengagement of Navy ROTC.’”

Bollinger said he has not been in discussions with the Army or Air Force about recognizing their ROTC programs. According to Army spokesman Mike Johnson, there are currently eight Columbia students enrolled in the Army ROTC program at nearby Fordham University.

Johnson said that the Army would discuss an ROTC program with Columbia if approached by the University. He noted that it generally costs \$1.6 million to start a new ROTC program, and that the Army’s main consideration in making a decision is the ability to produce 12 to 15 new officers per year.

Over the last few years, opposition towards ROTC at Columbia had centered around the military’s “Don’t Ask, Don’t Tell” policy, which Congress repealed in December. Many argued that this policy, which had prohibited gay soldiers from serving openly in the military, was discriminatory.

The DADT repeal will not take effect until the President, the Secretary of Defense, and the chairman of the Joint Chiefs of Staff certify that it will not harm their readiness to respond to conflict, which is expected to happen later this year. According to the Columbia statement, NROTC will not be recognized on campus until the DADT repeal is official.

The statement also noted that Steele’s committee will make sure that the NROTC program is consistent with Columbia’s non-discrimination policy. Bollinger said that this means largely that the committee will ensure that no discrimination against gay students exists after DADT is fully repealed.

But some students have opposed an ROTC program at Columbia because of the military’s policy of barring transgender individuals from enlisting. Columbia’s nondiscrimination policy prohibits discrimination on the basis of “gender identity and expression.”

Bollinger said that this policy is similar to DADT, calling it “something that affects people

in ways that injure them.” But he said it was not enough reason not to invite NROTC back to Columbia.

“It’s just something that at this stage, all things considered—because the University community was fully aware of this, the Council of Deans was fully aware of this—that itself will not preclude having a relationship [with the military],” Bollinger said. “Nevertheless, like with other issues, we want to keep working on it.”

Avi Edelman, CC ’11 and president of Everyone Allied Against Homophobia, took issue with Bollinger’s comment. He noted that in 2005, Bollinger opposed ROTC’s return to Columbia on the grounds that it discriminated against gay students under DADT.

“My question for President Bollinger is, what does ‘all things considered’ mean?” Edelman said, referring to the above quote. “Does it mean all things considered, there are enough gay and lesbian students to [merit] upholding our nondiscrimination policy, but not enough transgender students?”

Edelman said that in a meeting with Columbia administrators before the senate vote, EAAH members were told that Associate Provost Susan Rieger, who deals with equal opportunity and affirmative action, would issue a statement concerning ROTC’s compliance with the University’s nondiscrimination policy. But the group has not yet heard from Rieger.

Gavin McGown, CC ’13, who identifies as transgender, said this comment from Bollinger upset him even more than the decision to recognize NROTC. McGown called DADT and the policy barring transgender individuals from serving “completely analogous” forms of discrimination.

“[Bollinger’s] comment...was just a really profoundly flippant, I felt, way of dealing with our concerns,” McGown said.

Robledo said that the military’s policy barring transgender individuals is an “important issue,” but that barring ROTC from campus is not the solution.

“If the system is wrong you engage it and fix it,” Robledo said. “That’s the bottom line.”

## New board to pick up benefits agreement fund

### BENEFITS from front page

“My sense is that there is growing frustration on the part of the community which has heard about benefit agreements and have yet to see any tangible benefit. On the other hand what they have seen immediately are the negative impacts (rats, air pollution) of a large and growing construction effort in Manhattanville,” CB9 member Brad Taylor said.

Notice said he understands locals’ frustrations with the pace of the process, especially now that demolition and construction are underway between 125th and 131st streets.

“They could care less about this corporation stuff. They know that money went to the LDC, and they want to see it going out the door, and that’s what we’re going to start doing this summer and sooner,” Notice said, his hand resting on a four-inch binder which he said contains the bylaws of the new organization, the West Harlem Development Corporation.

Notice said that they hope to have the new West Harlem Development Corporation established, and the LDC dissolved, by mid-July. Notice insisted that efforts at increasing accountability, like getting an office and phone number for the corporation, are all on the way.

“Right now, that’s number one on the agenda. This doesn’t work without having that presence,” Notice said.

An IRS representative said that there is no record of the LDC or the new development corporation currently having tax-exempt status—something the organization must have before it can access the money Columbia allocated.

### COMMUNITY PERCEPTION

Since the benefits agreement legally must be administered

by a community organization; Columbia’s only role in the process is paying money into the community benefits fund. Yet neighborhood residents point to Columbia when benefits aren’t administered.

“When the community doesn’t know, it’s business as usual. Columbia may not be perceived that they’re doing what they’re supposed to be doing,” Notice said, adding that Columbia officials had expressed concern about that perception.

Communication between Notice, LDC members and University officials has increased in recent months, as the development corporation takes shape, and Columbia’s Executive Vice President Robert Kasdin described Notice as having “an extraordinarily difficult job.” But Maxine Griffith, executive vice president of government and community affairs, emphasized the limits of the University’s involvement.

“They have never asked—nor would it be appropriate for us to advise—regarding how they should be organized, or the timetable for their evolution,” Griffith said.

As for the disbursement of funds, “Yes, it has taken a bit of time, but you’d be asking a whole other set of questions if the funds had been spent quickly, but in a way that was not supportive of community needs,” said Griffith.

Meetings of the development corporation have now been scheduled on a monthly basis, and Notice committed to having an LDC or development corporation member at every general board meeting of CB9.

“I know they’ve struggled, but it will be, I’m confident, a very positive relationship,” University President Lee Bollinger said in March. “Community organizations

often have difficulty sustaining themselves over time, but I think this is so important and the funding is so real that it will keep going. I’m confident that it will work itself out.”

### BOARD CHANGES

Through the negotiation process with Columbia that took place from 2006 to 2009, the composition of the LDC went through drastic changes. After facing sharp criticism recently, those involved with the LDC’s transition say they want to keep a lower profile.

“What has happened in the past should stay in the past,” English said.

The development corporation’s board will be smaller and more focused than the LDC’s membership, according to Notice. The nine politicians on the original LDC will become three politicians on the development corporation—City Council member Robert Jackson, State Senator Keith Wright, and Congressman Charlie Rangel—and community board appointments will be reduced to two.

“The board was unwieldy,” LDC and CB9 member Vicky Gholson said. “Just in terms of numbers, there were just too many people to be able to facilitate decision-making, or more basic than that, to facilitate having all of the people in the same room.”

English said that he will be appointing those two community board members to the development corporation this week.

“We are moving towards a more professional board,” English said. “Once they get organized and have the right people involved, any problems will work themselves out naturally.”

Abby Mitchell contributed reporting.

# Light Blue wins first game on Sunday 8-5

BASEBALL from back page

conceded a double and eventually a run to Steve Harrington, as the score went to 2-1. Despite trouble finding the zone, Lowery got out of the inning with only one run allowed.

After pitching just four and one-third innings, Lowery left the game having allowed seven hits and three walks, and Giel took his place. After recording the second out of the inning, the reliever allowed a two-out double which brought in two Tigers (with the runs charged to Lowery).

In the top of the sixth, Senior Jason Banos led off with a double and eventually scored. Sophomore Dario Pizzano's homer in the eighth looked like it would be a game-winner, but the Tigers tied it up.

“I felt good at the plate all day. It was about pitch selection.”

—Dario Pizzano, sophomore outfielder

Head coach Brett Boretti thought Pizzano's homer was key.

“He had a couple of at-bats where he wasn't successful early in the first game, and comes up big in the first game with the home run and then again in the second game. It's credit to him sticking with it and continuing to try to have good ABs every time,” Boretti said.

Pizzano agreed that things just fell into place for him on Sunday.

“I felt good at the plate all day. It was about pitch selection: they were getting me out on high pitches, I was chasing pitches, but I got my pitch, tried to put a bat on it, and it just worked out for me,” he said.

Bowman had remained in the game, and Columbia finally cracked him in the ninth to make the score 6-4 before the Tigers made a pitching change. The Lions would score two more runs to make it 8-4 before their half of the inning came to a close. Harrington struck again, driving in another run, but the Light Blue finally won the long contest on a Giel strikeout. The sophomore actually ended up with a longer appearance than Lowery, as he would pitch an

KATE SCARBROUGH / STAFF PHOTOGRAPHER

**BIG HIT** | Sophomore Eric Williams' homer in the ninth put Columbia on top for good in game one.

impressive 4.2 innings.

“I came in earlier than I normally would, so I knew I would be out there for a long time,” Giel said. “Coming in with guys on base, I was just trying to get out of the inning with the least amount of damage as possible to get us back in there and get some runs.”

The Lions had 12 hits in the game, and the coach acknowledged the effort.

“I give the guys a lot of credit for going inning to inning, battling in there, and coming out with a victory at the end,” Boretti said.

There was definitely some urgency to move the second game along, both with impending thunderstorms and the slow

pace of game one. The night-cap didn't begin as well for the Light Blue, as Princeton got on the board with a run in the first. Sophomore starter Stefan Olson, who had an ERA below 1.50 before his start on Sunday, did not look like his typical self. The big killer for the Lions was the Tigers' five-run fourth inning. Princeton starter Zak Hermans, on the other hand, was sharper than his Columbia counterpart, as he didn't allow a base runner until the fifth.

Senior Alex Godshall was the Lion to discourage Hermans' no-hit bid with a double in the fifth. Pizzano attributed Columbia struggles to Hermans' talents.

“It was pitch selection for all of us,” Pizzano said. “Hermans

was living up in the zone and he was getting us to pop up, so we have to be more disciplined at the plate.”

Olson left after six, allowing six runs and three walks with five strikeouts. Junior Harrison Slutsky entered to pitch two solid innings.

“Stef [Olson] kept them off balance, but they got the big inning,” Boretti said. “Five runs, and majority of that with two outs. You have to give them credit for getting hits with two outs. But I think Stef battled after that. A couple of pitches he would probably like back, but other than that he did a good job—not many free bases, and he did a good job against the lefties with his change.”

Pizzano is also confident in his starters' abilities, and wants to do more for them as a hitter.

“Pat and Stef give it to us every week,” he said of the pitchers. “They're always stepping up for us and we have to start stepping up for them.”

The Light Blue finally threatened in the eighth when Hermans started to tire. Pizzano whacked his second homer of the day with a two-run blast to right. Princeton reliever David Palms would then enter the game for his second shaky appearance of the game, but managed to leave the inning unscathed, and the Tigers followed to hold for the victory.

The two teams will face off again to finish the series today, with 1 p.m. and 3:30 p.m. starts.

sports@columbiaspectator.com

# Tennis ends year with loss to Cornell

BY KUNAL GUPTA  
Spectator Senior Staff Writer

The disappointing 2010-2011 season came to a close for the men's tennis team this weekend, as they watched No. 40 Cornell celebrate their first ever Ivy League title on Columbia's home court after a resounding 6-1 win. The Lions finished the season 8-15 (2-5 Ivy) and failed in their quest to make it three Ivy League titles in a row. This is the team's first losing season, both overall and in Ivy play, since 2001-2002, when they went 5-12 (1-6 Ivy).

“I was going in with a lot of confidence, the boys had a great week of practice, and God, I thought we played great doubles,” head coach Bid Goswami said.

Columbia, after winning the doubles point in its last two matches, was swept in all three doubles matches by Cornell on Saturday. Sophomores Nate Gery and John Yetimoglu lost 8-5 at No. 1 doubles, junior Haig Schneiderman and senior Sho Matsumoto fell 8-6 at No. 2, and at No 3 junior Rajeev Deb-Sen and senior Kevin Kung lost 9-7 in a tiebreak in the closest match of the doubles point.

“They didn't miss any volleys, Sho and Haig,” Goswami said. “We were up 40-15 at 2-2, Cornell rallied to break, and

that was the only break of the match.”

Columbia found itself down 1-0 after the doubles, but sophomore Nate Gery evened up the match quickly, winning 6-2, 6-3 at No. 3 singles. Freshman Tizian Bucher was serving for the first set, but was broken and fell in a tiebreak, going on to lose 7-6, 6-2 at No. 5 singles. Senior co-captain Kevin Kung lost 6-4, 6-3 at No. 2 singles in his last match for Columbia. The Light Blue needed to win three of the remaining four singles matches to pull out the upset win, but first set losses at No. 4 and 6 singles made that too much of an uphill climb. Sophomore Cyril Bucher lost at No. 4 6-2, 6-4 to give Cornell the four points it needed to clinch the win.

“I was going in with a lot of confidence.”

—Bid Goswami, head coach

All eyes turned to Schneiderman, who was down 5-2 in the second set after winning the first 7-5. Schneiderman rallied to 5-4 but senior Jonathan Jaklitsch broke him to end the set. The two played a supertiebreak since the outcome of the match had already been decided. The pair were neck and neck until Jaclitsch led 9-8 and came to the net. Schneiderman just missed a running backhand pass to give Jaklitsch the win, and Cornell

ALYSON GOULDEN / SENIOR STAFF PHOTOGRAPHER

**ONLY ONE** | Sophomore Nathaniel Gery was the only Light Blue player to win a match against Cornell in Columba's final match of the year.

a 6-1 win over the two-time defending champions.

Goswami highlighted the narrow margins in the singles.

“This year it felt like one or two points if we could get,

it changes the whole tide,” he said. “We won the first set at No. 1 and No. 3 and Tizian was serving, and I thought it was a perfect matchup for him and I thought John could maybe

pull it out at No. 6. I thought we had a shot even after the doubles. But that's how it went this year.”

Goswami had a positive outlook for next season, pointing

to the Class of 2015.

“We have a good class coming in,” Goswami said. “And with the intermingling of these guys, we could be back to the top next year.”

# Softball sweeps Princeton on Sunday

BY REBEKA COHAN  
*Spectator Staff Writer*

The season might be almost over, but senior pitcher Maggie Johnson is still proving that she has a lot left to offer during her final games playing for the Light Blue.

The Lions (15-24, 5-9 Ivy) swept Princeton (13-21, 4-8 Ivy) away this weekend 5-3 and 2-0 during a doubleheader on Sunday. Columbia was originally scheduled to play the Tigers for two consecutive double-headers on both Saturday and Sunday, but due to bad weather, Saturday's games were postponed until Tuesday. The second game saw Johnson throw the first no-hitter of her four-year career at Columbia, and the senior finished with her lowest ERA of the season, 1.95.

Johnson was quick to cite the rest of the team as a major contributor to her great game on Sunday. "Well any pop up to [Emily] Caruthers I know she'll get so I wasn't worried

about that; in fact, each ball they made contact with I knew my defense would get. I also attribute much of my success today to my catcher Anne Marie Skyliis, who was able to get some great calls and worked her butt off for me behind the plate," she wrote in an email.

"I hadn't thrown a no-hitter since I was eleven."

—Maggie Johnson,  
senior pitcher

Game one didn't start out well for the Lions, as they were down 3-0 after the Tigers had an explosive second inning. The Light Blue was able to overcome the deficit during the fifth, however, where they scored three runs of their own. The Lions managed to put it away in the sixth, in which

they scored another two runs to secure the win.

Johnson began game two by striking out the three leadoff batters in the bottom of the first. She walked one batter in both the third and fourth innings, but neither was able to advance to second base. Johnson would hold off the Princeton bats for the remainder of the game to secure the win.

The Light Blue got on the scoreboard after sophomore infielder Jennifer Bergeron stole second and scored off a single to center by Skyliis. Columbia scored once more after freshman outfielder Emily Caruthers stole her 11th base of the season. Bergeron brought the freshman home with a groundout to put Columbia up 2-0.

Johnson was excited about the no-hitter, which actually was not the first of her softball career. "My dad actually texted me after the game to say congrats and to tell me I hadn't thrown a no-hitter since I was eleven," Johnson wrote.

GIFT OF THE MAGGIE | Senior pitcher Maggie Johnson threw a no-hitter against the Tigers.

# MONDAY MORNING CLOSER

## week 4

### GAME BALL

Game ball goes to sophomore Darrio Pizzano, who recorded one run in each game. In game one, Pizzano hit a solo home run at the top of the eighth to temporarily give Columbia a 4-3 lead. Even though the Tigers tied it up at the bottom of the inning, Pizzano allowed the Lions to stay in the game.

### RAIN DELAY

The Light Blue was initially scheduled to go against Princeton in two consecutive doubleheaders on Saturday and Sunday. However, inclement weather early this weekend saw both of Saturday's games postponed until Monday afternoon.

### TURNING POINT

In the second game of the afternoon, Princeton was only leading by one run going into the fourth inning, but the Tigers' bats exploded to give them a 6-0 lead. Columbia would go on to score four runs—two in the fifth and two in the eighth—but it was unable to overcome the lead that the Tigers had built up.

### INJURY REPORT

Junior Jon Eisen and senior Alex Ferrera returned to the Columbia lineup this Sunday, after last weekend's absence.

### BY THE NUMBERS

13 Hits for Columbia during the first game, against Princeton. The Lions were able to take advantage of Princeton's pitching mistakes to come out on top in game one.

10 Innings the Columbia starters combined to pitch this weekend. Pat Lowery only threw 4.1 innings in game one, and was relieved by sophomore Tim Giel, who recorded his first win of the season.

4 Number of home runs Darrio Pizzano has recorded this season. Pizzano is only behind Jason Banos, who holds five, for the Light Blue.

COURTESY OF COLUMBIA ATHLETICS

**FIRST PLACE** | Freshman Michelle Piyapattrra shot three under par to finish first at the Ivy championship.

## Men’s golf places second at Ivy championship

### GOLF from back page

would produce a number of low scores.

“Since it was better weather, I knew the scores would be much lower than they were before, so I really tried to get out there and get after it,” Piyapattrra said.

Piyapattrra posted the best score in each of the first two rounds (a 72 and 73), and her final-round 69 was only bested by 68 from Princeton’s Rachel Blum.

Par-5s were key in Piyapattrra’s success, as she went seven-under par on those holes throughout the course of the weekend.

This was Piyapattrra’s third tournament victory of the season. Her top finish also gave her the chance to compete in a Monday qualifier at the LPGA ShopRite Classic, which will take place on May 30.

Despite Piyapattrra’s strong performance this weekend, the Lions finished fifth as a team, but improved by 20 strokes from the second to the third round. Junior Robin Lee tallied six birdies on the closing

day, and was a large part of the reason for that day’s success.

“Since it was better weather, I knew the scores would be much lower.”

—Michelle Piyapattrra, freshman golfer

The men began the weekend slowly, finishing the first day in sixth place. Despite the apparent struggles, head coach Rich Mueller and the team knew that they would experience a slow start, as it had been a trend all season.

“Our first rounds all year have not been our best rounds. “Mueller said. “We

all knew that that was going to be the case. We knew how it was going to go. The only thing that went wrong with our plan was that Yale played out of their minds [in the final round].”

Each round saw the Lions improve, as they shaved twelve strokes off in the second round and another five on the final day. Mueller felt the teams’ poor performance on the Par 5s was the biggest factor in the way they played.

Although Mueller made sure to note that no excuses should be made, there can be no ignoring the role that luck played in the Lions performance on the first day.

“It’s a very tough golf course, and the weather can make it even more difficult, and we had a little bit of bad luck on the first day,” Mueller said.

The early tee time proved to be too much for the Lions in the first round, as they would face temperatures around 40 degrees.

Junior Brendan Doyle was the only

### MEN’S LIGHTWEIGHT ROWING

PLACED 3RD OUT OF 4 TEAMS IN VARSITY EIGHTS FOR GEIGER CUP

Columbia’s lightweight rowers raced for the Geiger Cup against Cornell, Georgetown, and MIT on Saturday. The Lions’ varsity eights come in third place, finishing an impressive 24.3 seconds ahead of MIT. The second varsity eights also finished in third place, behind Cornell’s second and third varsity crews. The fourth-ranked freshman eights surprised everyone and finished first, five seconds ahead of the top-ranked Big Red. Cornell held a full-length lead by 1000 meters going into the third 500, but the Light Blue was able to draw even and overcome Cornell in the final 250 meters.

—Rebeka Cohan

### MEN’S HEAVYWEIGHT ROWING

PLACED 3RD OUT OF 3 TEAMS IN VARSITY EIGHTS FOR DOC LUSINS TROPHY

The Light Blue men’s heavyweight rowing team raced against Boston University and Syracuse as it tried to claim the Doc Lusins Trophy this Friday. Despite the high winds and rough water, the Lions started off even against both the Orange and the Terriers. However, by the final 500 meters, Columbia was unable to keep up. The varsity eights came in third, finishing seven seconds after second-place Syracuse. The second varsity eights also came in third place, while the freshman eights finished second, 10.2 seconds after Boston University.

—Rebeka Cohan

### WOMEN’S ROWING

PLACED 2ND OUT OF 3 TEAMS IN VARSITY EIGHTS FOR DUNN BOWL

This Saturday, the Columbia women’s rowing team traveled to Providence, Rhode Island to race against second-ranked Brown and third-ranked Cornell for the rights to the Dunn Bowl. Columbia was able to overcome the bad weather—the varsity eights came in second, ahead of the Big Red. During the final 500 meters, Columbia’s shell faltered and Cornell was almost able to overcome the Light Blue, but the Lions still finished ahead of the Big Red by six one-hundredths of a second.

—Rebeka Cohan

### TRACK AND FIELD

JUNIOR SHARAY HALE PLACED FIRST IN BOTH THE 200 AND 400M DASH

Men’s and women’s track and field traveled to Princeton, N.J. in full force to compete in the Larry Ellis Invitational against 34 other teams. Junior Sharay Hale finished the 200m in 23.69 seconds and the 400m in 53.10 seconds. Hale placed first overall in both races, which featured twelve and nine heats respectively. Senior Dylan Isaacson posted the second-best time in the 800m run, crossing the finish line in 1:52.95. Freshman Cody Love continued a strong first-year campaign by taking fourth in the 400m hurdles.

—Jeremiah Sharf

Columbia golfer to break 80 in a first round that pitted the Light Blue against windy, blisteringly cold weather conditions. Doyle, who shot a 74, finished the tournament in third place, giving him first team all-Ivy honors.

Senior Clark Granum completed his fourth and final Ivy League Championship in a tie for seventh, giving him second team all-Ivy. This was Granum’s fourth consecutive all-Ivy honor, making him the first golfer in Columbia history to achieve such a feat.

Despite beginning the second round in sixth place, the Lions finished in second place as a team.

“I’m just so proud of our team and the way they fought back, I couldn’t be happier for Brendan and Clark, and really all of the guys,” Mueller said.

While difficult weather may have sealed the fates of both Columbia golf

teams, both coaches had very positive outlooks for the coming years.

“Having an Ivy champion in the first year means that we’ve got three more years with Michelle,” Williams said. “Everybody played every tournament this year, so we have a ton of experience coming back.”

Coach Mueller also noted the importance of the returning players, but also noted the impact of the departures of two seniors who played integral roles in making Columbia golf successful—Clark Granum and Justin Lee.

“Both Justin and Clark have left such an important mark on our program,” Mueller said. “Every kid that comes into this program is not replaceable, you just get new players.”

Both teams appear eager to start the next season, and they each show strong promise for the years to come.

## Columbia athletics should expand beyond the United States to recruit students

### MOHANKA from back page

can’t attract the cream of the crop in America because of the Ivy restrictions that don’t apply to state schools.

That being said, it’s not that Columbia doesn’t recruit internationally. They do, but it’s very limited from what I’ve seen.

A little research told me that Columbia has a fair few ‘international’ students on the athletics department’s overall roster. However, most of them studied at high schools within the U.S., so I wouldn’t call them foreign recruits (and neither should you).

Of the handful of internationals who had never lived in the U.S. before coming to Morningside Heights (approximately 10 out of over 700 student-athletes), several have been star performers. The biggest name, in my opinion, would be Henning Sauerbier (from the men’s soccer team). The freshman won the Ivy League Rookie of the Year award in 2010, and the spring season has seen him continue where he left off in the fall. However, and here’s the important part—he approached Columbia. It wasn’t that the Lions spotted his talent and reached out to him in an attempt to bring him here. Imagine how many other Henning-esque athletes there are in lands far, far away?

Now, I’m not criticizing Columbia athletics—I’m sure there are several hurdles to international recruiting, arising from bureaucracy, of which I’m unaware. I’m just saying that there’s a lot that can be done that isn’t being done. I mean, if every team’s recruiting class contains an American like Noruwa Agho, David Najem, or Nzingha Prescod, then we probably don’t need to look abroad—but these gems are hard to unearth and bring to Columbia.

Besides Henning, Nick Scott from the men’s soccer team is another international in the most legitimate sense, and he was recruited for the Lions thanks to assistant coach Tommy McMenemy’s British connection. ‘Scotty’ had an impressive freshman season on the left flank, and while he wasn’t at his best as a sophomore, there’s no doubt that the Englishman has the talent to be a solid college soccer player.

Why do I never stop talking about soccer? Good question, I’ll answer it some other time. However, there’s a valid reason the beautiful game is important in this discussion. I don’t think anyone would argue that soccer in America isn’t treated like leftovers. The sport lives in the shadow of the giant misnomer (football), the hoops,

and the ball game. So while high school athletes here are superior in terms of physical attributes, their understanding of soccer often does not reach the level of a high schooler plying his trade in England, Germany, Spain, or Italy, to name a few. Those countries live and breathe the beautiful game, and technical skills are developed far more than they are here, primarily because it’s the numero uno sport.

This argument extends to several other sports. A fencing recruit from Russia, a squash player from Egypt, a tennis player from literally anywhere in Europe, and more—the very best athletes in those countries may all have technical advantages in their sport over their American counterparts. The Bucher brothers from Switzerland and Ioana Alecsiu from Romania are all doing well for Columbia tennis, mainly because those countries take the sport more seriously than America does. It’s important to understand that our foreign recruits—the soccer boys, the tennis players, and the rowers to name a few—have done well for their teams at Columbia, and integrated well into the community.

Speaking of squash, Ramit Tandon, India’s number one junior squash

player and one of the top-ranked juniors in the world, has committed to being a part of the Class of 2015. I know for a fact that he wasn’t recruited, since I was the one who gave him the Columbia coach’s email address to get in touch. Clearly, Coach Swanepoel deemed Ramit talented enough, showing that there’s a whole wealth of talent out there waiting to be tapped.

The million dollars that Columbia Athletics spends every year on recruiting hasn’t had the desired success in terms of making the Light Blue an athletic powerhouse. Maybe something simple, like allowing global centers to facilitate recruiting in terms of allowing students in those regions to submit videos or express interest, can help. I genuinely think it’s time to start thinking ahead, and while the other Ivies do recruit athletes internationally to an extent, we can make the first big steps in that arena. If the other Ivies all started recruiting abroad, we would have to, right? Why not make them start doing it?

I understand there may be issues in terms of funding, since Columbia isn’t need-blind in foreign admissions, and we can’t offer scholarships, but Columbia does guarantee to meet the demonstrated need for

any student who is admitted. And for a lot of internationals, the quality of education is hugely important. I know for Ramit and Henning it was—and how many universities in the world can compete with us? College sports are bigger in the USA than anywhere else abroad—so for an athlete who isn’t looking to go pro, the draw of the American education coupled with the quality of college athletics could swing any decision.

Besides raising the standard of Ivy sports, and potentially bringing Columbia more success, international recruiting will have one more huge positive. Our university brochure is plastered with the word ‘diversity,’ and making our athletic teams more diverse will bring in another dimension to a student-athlete’s education. They will have the opportunity to learn about a new culture from their teammates, and the exposure to a global perspective will not only make them more accepting of other points of view, but also more aware citizens of the world.

So let’s go global, and make the world our oyster.

# A call for CU to expand global recruitment

**A** friend told me that I was featured (alongside Professors Sachs and Stiglitz) in a press release for the Columbia Goes Global conference last week. I'm still not quite sure how that mix-up happened, but I did keep an eye out for what was discussed: global issues, the notion of globalization, as well as how Columbia can make a global impact, amongst other things. Well, I grew up in India before going to boarding school in England – so I'm a huge fan of the idea. However, I don't think we should stop at opening global centers and trying to get students to spend more time in other parts of the globe. There's a wide range of sporting talent out there in the big bad world, and I strongly believe that our athletics department should make global recruitment a higher priority than it is now.

**MRINAL  
MOHANKA**

## Word on the Street

There's a wide range of sporting talent out there.

At the outset, let me clarify that I don't expect global recruiting to ever be on the agenda for football and baseball. Basketball could potentially benefit from European recruiting. Also, I'm not advocating a policy of going global simply because I feel there aren't enough talented athletes within the American borders, but more so due to the fact that we often

**PIZZAZZ** | Sophomore Dario Pizzano's homer in the top of the eighth in game one shifted the momentum in the Lions' favor.

# Lions split Sunday's doubleheader against Tigers

**BY MOLLY TOW**  
*Spectator Staff Writer*

Sunday saw a faceoff between the cats of the Ivy League, and the claws clearly came out. The Columbia baseball team (17-19, 7-7 Ivy) split Sunday's doubleheader at Princeton (16-18, 10-4 Ivy) as the Lions took the first game 8-5 and fell 6-4 in the nightcap.

The oddity of the day was starting pitching woes for both teams. Both Princeton and Columbia boast skilled

staffs, but all four starters had command struggles.

Columbia continued its trend of getting on the board early, scoring two runs in the top of the second and forcing Princeton starter Matt Bowman's pitch count up to 56 at the end of three. Junior Alexander Aurricchio and senior Eric Williams began the second with a pair of singles. Aurricchio scored on a Princeton error and senior Nick Cox, consistently a catalyst, drove in Williams for the second run of the

inning. Sophomore Tim Giel attributed some of this success to having the starting lineup back again, with junior Jon Eisen and senior Alex Ferrera returning at Princeton after a spell on the sidelines.

"Everyone's back from injuries, and we're getting back into the flow of things," Giel said.

Columbia junior starting pitcher Pat Lowery's troubles started when he

# Light Blue freshman takes Ivy title in Golf

# Piyapattra shoots two under, wins by 10 strokes

**BY JEREMIAH SHARF**  
*Spectator Staff Writer*

Columbia's men's and women's golf teams put forth impressive showings at the Ivy League Championships, but Yale took top honors in both competitions this weekend. Individually, three Lions took home all-Ivy honors.

Freshman Michelle Piyapattra ran away with the individual title for the women, posting an exceptional two-under-par aggregate score over the three days. Her score was 10 strokes ahead of the next best competitor, Harvard's Mia Kabasakalis.

Head coach Kari Williams knew that Piyapattra was ready from the moment she arrived at Atlantic City Country Club.

"She was incredibly steady," Williams said of the freshman. "I think that from the second shot of the practice round, she was very comfortable with the golf course."

Although no other competitor was able to break par for the weekend, Piyapattra said she felt the course did not present too many challenges.

"I felt pretty comfortable with the course," Piyaattra told Ivy League Sports. "It wasn't that long, and I had really good ball striking this weekend."

Going into the final round, Piyapattra had a sizable six-stroke advantage, but she knew the good weather on the final day
